The Network Startup Resource Center (NSRC), which is funded primarily by the U.S. Corporation for Education Network Advancement (CENSA), is an initiative of the Internet Corporation for Assigned Names and Numbers (ICANN), the Internet Society, and Google, with additional contributions from dozens of public and private organizations.

**About Us**

The NSRC cultivates collaboration among a community of peers to build and improve a global Internet that benefits all parties. We facilitate the growth of sustainable Internet infrastructure via technical training and engineering assistance to enrich the network of networks. Our goal is to connect people.

During the quarter century that this group has been helping to build Internet infrastructure around the world, there’s hardly a place on the planet that has not been touched by the great work of the Network Startup Resource Center.

**Global Internet Development Activities**

NSRC trainers and engineers traveled to Thimphu, Bhutan to help improve the country’s Internet infrastructure. National Knowledge Networks (NKN) and the Office of the Vice Chancellor for the Royal University of Bhutan (RUB) invited NSRC personnel to provide network engineering assistance to the Royal University of Bhutan (RUB) in cooperation with the network operators in Bhutan.

In order to join the global research and education network fabric, Karma Jamyang and Sonam Wangmo, of the National Knowledge Network of India (NKN), and the Trans-Eurasia Network Design and Implementation Program (TEIN), requested support from the National Knowledge Network of India (NKN) and the Trans-Eurasia Information Network (TEIN), in order to join the global research and education network fabric. Further, in late 2014, the European Commission Directorate-General for International Cooperation and Development (DG INTCO) also provided additional support to the National Knowledge Network of India (NKN) and the Trans-Eurasia Information Network (TEIN), in order to join the global research and education network fabric.

**2015 Activities in Bhutan**

People Trained Globally Each Year

- Women
- Men
- Total People Trained

In 2015, the National Knowledge Network of India (NKN) and the Trans-Eurasia Information Network (TEIN) provided additional support to the National Knowledge Network of India (NKN) and the Trans-Eurasia Information Network (TEIN) in order to join the global research and education network fabric. Further, in late 2014, the European Commission Directorate-General for International Cooperation and Development (DG INTCO) also provided additional support to the National Knowledge Network of India (NKN) and the Trans-Eurasia Information Network (TEIN), in order to join the global research and education network fabric.
