Why DNSSEC

An interactive demo

We'll walk through a demonstration illustrating the real risks associated with insecure DNS

We will use a simple application: a web browser, to show how end users can be affected by this kind of attack.

An interactive demo

DEMO

An interactive demo

Now what we have seen illustrates the problem with just one application, albeit a large one, of the internet (the Web)

What about:

- Email ?
- Chat ?
- IP telephony ?
- File transfers ?
